

# GRAVITY

TRAINING (PTY) LTD

COMPANY  
PROFILE

Gravity Training is a leading work at height safety solutions company in South Africa with an international footprint throughout Africa, Europe, the Middle East, India and Australia. Gravity Training offers a wide range of exceptional training courses, such as work at height and rigging training. Beyond these courses, Gravity Training also offers other services related to work at height, such as the development of fall protection plans and consultation services.

Gravity Training was first established in 1999 and is well known for being a specialist in the work at height and rigging industry. We are accredited by Services SETA, merSETA and IRATA.

## OUR SERVICES

Our main focus is on industrial work at height and rigging courses. However, we believe that our biggest advantage lies in focusing on each client's specific needs. We do this by customising services to the client's relevant industry whilst always complying with the relevant accreditation authority's requirements.

### INDUSTRIAL COURSES

#### Fall Arrest Courses

- Basic Fall Arrest Level 1 – 1 Day Course
- Fall Arrest and Basic Rescue Level 2 – 2 Day Course

#### Rigging Courses

## KEY FOCUS AREAS

Gravity Training offers a wide range of exceptional training courses, such as work at height and rigging training as well as other services related to work at height, such as the development of fall protection plans and consultation services.

One of the key pillars to our success is the quality we commit to and we continually strive to uphold and enhance the quality of all our services and products.

We support innovation within our industry and aspire to be forerunners in our field. We aim to be the first to make changes that advance the industry, and to implement those changes to the best of our ability. We are therefore investing heavily into the digitisation of processes in order to reduce certificate lead times and enable verification of learner certificates on our on-line system. We are incorporating virtual reality experiences into some of our training courses and some courses can now be done online (e-learning).
